PROPERTIES OF THE COVER FABRIC

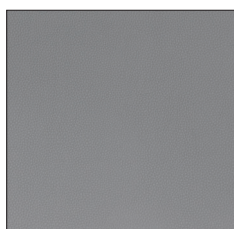

This synthetic leather is a very soft type of PU leather. Its PU coating generally provides a natural leather appearance, which may range from smooth to highly textured. Synthetic leather is characterised by its high wear resistance, abrasion resistance and easy cleaning.

For cleaning, it mostly suffices to wipe the soiled areas with a damp cloth. Do not use oil-containing or grease-containing cleaning agents or scouring agents since they may damage the surface. Discolouring due to cushions and/or clothing fabrics does not represent a defect of the cover fabric. Colour and texture deviations are typical for this product and do not entitle users to any claims.
