## PROPERTIES OF THE COVER FABRIC

Due to its typical properties and behaviour upon use, flat-weave is prone to certain fuzzing, which may also lead to pilling. It is also possible that foreign fibres adhere to the material. Any knots or pilling occurred in that way may be removed using a lint-removal device. Such fibre properties do not entitle users to any claims.

Discolouring due to cushions and/or clothing fabrics does not represent a defect of the cover fabric. Colour and texture deviations are typical for this product and do not entitle users to any claims. Interaction of pressure, heat and humidity may lead to pile displacement (pressure marks). This property is referred to as indentation or seating marks and is a typical feature that does not represent minor quality in any way.
